Korg MS2000B / MS2000BR Руководство пользователя. Дополнение.

Аналоговый моделирующий синтезатор

Гарантийное обслуживание

По всем вопросам, связанным с ремонтом или сервисным обслуживанием аналогового моделирующего синтезатора MS2000B / MS2000BR, обращайтесь к представителям фирмы Korg — компании A&T Trade. Телефон для справок (095) 242-5325.

Введение

Благодарим за приобретение аналогового моделирующего синтезатора MS2000B/BR. Для поддержания прибора в исправном состоянии и его продолжительной бесперебойной работы, внимательно прочитайте данное руководство и следуйте всем инструкциям по эксплуатации.

На лицевой панели MS2000B имеется микрофонный XLR-разъем. Также в комплект поставки входит гибкий микрофон, подключаемый непосредственно к данному разъему, который обеспечивает возможность работы с функциями вокодер.

Кроме этого, MS2000B и MS2000BR содержат ряд новых внутренних программ, по сравнению с оригиналом MS2000/R (см. "Список программ").

Характеристики и функции прибора аналогичны моделям MS2000 / MS2000R. Обращайтесь к руководству пользователя MS2000 / MS2000R.

Коммутация микрофона (только MS2000B)

При работе с микрофоном не используйте разъем AUDIO IN 2.

Используйте только прилагаемый к MS2000B микрофон и соответствующий разъем.

При неиспользуемых разъеме AUDIO IN 2 или микрофонном входе закрывайте регулятор AUDIO IN [2/VOICE].

Не прилагайте избыточных усилий к микрофону и не изгибайте постоянно его держатель без необходимости. Это может привести к поломке микрофона и нарушению внутренней коммутации.

Установка микрофона

Обращайтесь к главе "Использование функции вокодера" руководства пользователя MS2000/MS2000R. При подключении микрофона к MS2000B, правильно совмещайте коммутируемые разъемы (винт на держателе микрофона должен быть обращен к тыльной панели MS2000B).

Для установки и снятия микрофона держите его за основание.
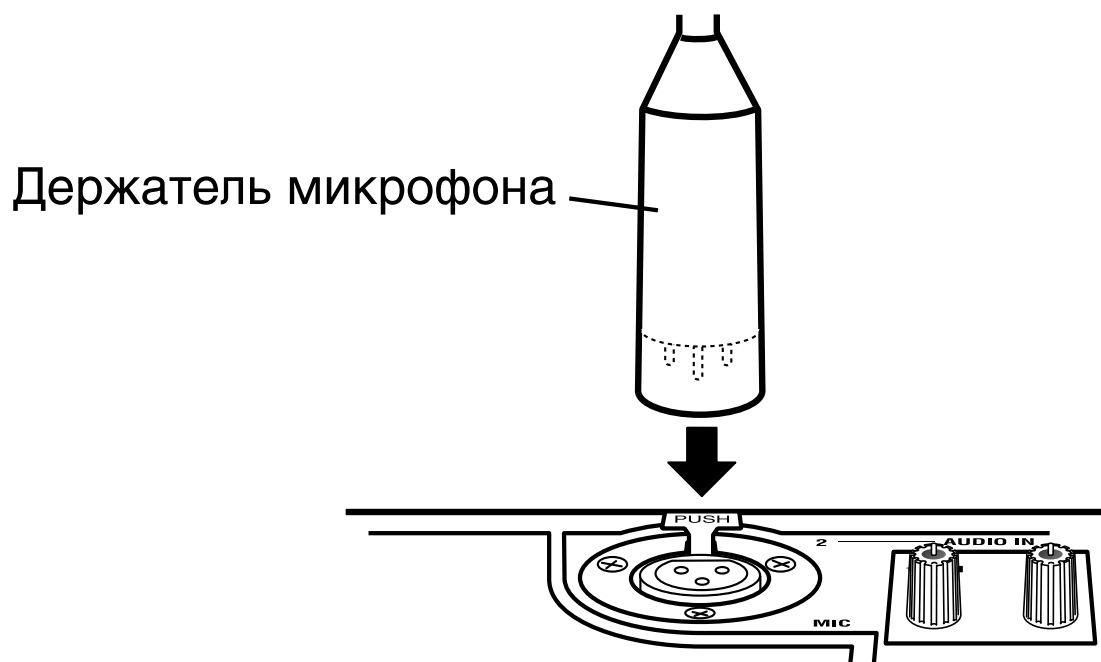

Отсоединение микрофона

Нажмите защелку для разблокирования микрофонного разъема и, удерживая микрофон за основание, вытащите его из разъема.

Перед отсоединением микрофона обязательно нажимайте защелку.

Список программ
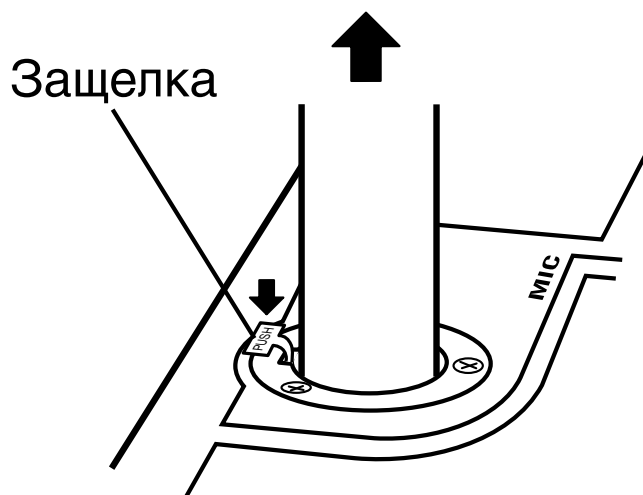

№	Название	Группа	Режим	SEQ 1		SEQ 2	SEQ 3	ARPEGGIATOR
A01	UnisonRingLD	Synth-Lead	Single	Cutoff		Panpot		Off
A02	Flashin'Pad	Seq/Motion	Single	LFO2 Frequency		Cutoff EG1 Intensity	Panpot	Off
